

LWM OPERATOR TRAINING

Have you purchased an LWM or already integrated it into your system and would now like to be able to carry out proper, first-class operation and maintenance?

IN THIS TRAINING YOU WILL LEARN EVERYTHING ABOUT THE LASER WELDING MONITOR.

We will introduce you to the operating procedures and then put them into practice with your data. Adjusting references and troubleshooting are practiced using customer data.

Target group: Operators

Training location: Gaggenau

Goals:

- Operation and maintenance of the LWM
- Reference creation
- Check the cables and sensors

Duration: 2 days

Number of participants: Maximum 6

Food: Meals are provided on site and are included in the price.

Seminar conclusion: After successfully completing the training, a certificate will be issued with the areas of focus learned.
